# JSC "South Ural Magnesium Compounds Plant"

[uzms\\_rus@mail.ru](mailto:uzms_rus@mail.ru)

# We are perfecting for you!

The boric acid workshop of OJSC South Ural Cryolite Plant commissioned in 1965. Since 1997 has been started the production of magnesium sulfate. In 2005 due to the lack of raw materials, the boric acid workshop suspended the work. The production of boric acid and magnesium sulfate ceased.

In 2014, at the initiative of OJSC Lithosphere and with the support of the government of the Orenburg Region, has been established JSC South Ural Magnesium Compounds Plant to organize the production of magnesium Sulfate 7-Hydrate.

The pulp and paper industry includes a production facility, an ore warehouse, a compressor station, a water circulation pump station with a cooling tower, a finished product warehouse, a laboratory, a residential building, storage facilities, and mechanical repair workshops.

# Why is magnesium sulfate in demand in the European market?

- ▶ Universal fertilizer suitable for any crop and not disturbing the pH balance of the soil
- ▶ It is used as an additive for road surface – a component of magnesia cement.
- ▶ In cosmetology it acts as a sedative and the basis of therapeutic baths.
- ▶ Also it used in household chemistry and in the production of pulp and paper industry.

# Questions that may arise.
